INFORMATION SECURITY POLICY

Saba Infraestructuras, as a manager of car parks and regulated areas on public roads, has as its main objective to offer its clients a quality service in line with the benchmark position it holds in the sustainable urban mobility sector, which incorporates measures and controls in the field of Information Security based on a risk analysis, in order to guarantee the confidentiality, integrity, availability, authenticity and traceability of the information.

Saba, through its Integrated Management System, establishes strategic objectives equipped with the necessary resources to implement actions that ensure the continuity of the service for all its stakeholders in a safe and efficient manner, complying with current legislation and with the voluntary commitments signed with third parties, especially with regard to compliance with the regulations on personal data protection.

Raising awareness and training our employees, improving the performance of our processes through optimal design and planning in the operation and maintenance of our systems, providing them with the corresponding safety measures, as well as controlling and measuring the results achieved, are the basis for achieving goals and objectives through continuous improvement.

The roles and responsibilities that are part of Saba's Information Security Management System are set out in the Privacy and Security Relationship Model.

Saba's Management undertakes to review this policy periodically, adapting it to new requirements that may arise and makes it available to all interested parties who require it, disseminating it among all its employees and contractors, and making it available to our customers and the rest of the Company.
